DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7, 9, 11, and 13 -14 are rejected under 35 U.S.C. 102(e) as being anticipated by Bang (US Pat. 6,618,214).

Regarding claims 1-7, 9, 11, and 13 -14 Bang discloses an apparatus mountable to a surface and for holding an electronic device, comprising: a mount assembly 1 for holding the electronic device 10; and a base 14 including a lower portion 16 mountable to the surface 10 and an upper portion 22 attached to the mount, wherein the base 14 includes weights 23, a gel portion 17, and a mat 30 to conform to the surface wherein the mount 1 has integral power/data connections wherein the weights 23 are metal wherein the metal 23 is lead and is cast into the gel portion wherein the base includes an alloy armature wherein the base 14 includes a central anchor post wherein the mat is made of rubber wherein the base is washable wherein the weights are insert molded into the base.

Allowable Subject Matter

3. Claims 8, 10 , 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose the base has three toes, each of which has a weight or that the mount assembly includes a pivotable hinge connected to the base.

4. Claims 16-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose a mount assembly is pivotable.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chu (US Pat. 6,449,157) teaches IC package assembly with retention mechanism.

Mata et al. (US 2004/0114313) teach apparatus and method for cable management.
